

Safe Gun Storage

Easy access to guns can lead to tragic consequences.

Every day, 12 children are killed by a gun in the U.S.

1 in 3 U.S. homes with children under 18 have a gun.

43% of those homes have an unlocked gun.

3 in 4 children ages 5 to 14 know where guns are kept in their home.

1 in 5 report handling a gun in the home without their parents' knowledge.

SAFE GUN STORAGE SAVES LIVES

Locking devices can be purchased wherever guns and firearm accessories are sold. Ask your Bronson healthcare provider, Childhood Injury Prevention or your local sheriff's department about how to receive free gun safety locks for the guns in your home.

Pictured below are just a few safe storage options.

Trigger lock

Cable lock

Ammunition stored separately

Lock box

Gun safe
